**UHN Regional Histocompatibility Lab
SickKids Testing Requisition – Heart Transplant interpretation:**

<p>Allo – Crossmatch with Heart Donor</p>	<ul style="list-style-type: none"> • Crossmatch and autocrossmatch as needed, between recipient and selected donor. • Please indicate if sample submitted with this requisition is a donor or recipient sample. • Note separate requisitions needed for donor and recipient. • For pre-deceased donor crossmatches, please indicate STAT or Non-STAT
<p>STAT Prospective XM for High Risk Deceased Donor Recipient</p>	<ul style="list-style-type: none"> • For High PRA and/or DSA Pos Patients: T and B cell XM on current and peak PRA serum is done and results are available prior to Tx OR. • PRA is done non-stat and reported out during or after transplant.
<p>Non-STATXM for Low risk Deceased Donor Recipient</p>	<ul style="list-style-type: none"> • For low immunologic risk recipients: T and B cell XM may be performed the next day and reported out post transplant.
<p>Lab will determine the appropriate technique based on patient testing history as a default. Lab may also change technique from the original order if an alternative is felt to be preferable but will discuss with ordering clinician before doing so. Autocrossmatch included for recipient at least once prior to transplant.</p>	
<p>You may request testing on current serum sent with requisition but also on prior serum that we have in the lab. Indicate whether pre-transplant or another date serum is to be tested concurrently.</p>
