

# 5-Day Advanced Clinical Skills Course

# PHYSIOTHERAPY FOR

# FUNCTIONAL MOVEMENT

# DISORDER (FMD)

The Integrated Movement Disorders Program is an internationally-renowned clinical research program specializing in the holistic rehabilitation of FMD.

Join us for an immersive one-to-one clinical course with observership designed to advance your competencies. You will develop an evidence-based mind-body-brain approach to providing individualized physiotherapy for FMD.

## COURSE DETAILS

- 📅 This course runs for five consecutive days. If your application is successful, the start date will be confirmed.
- 📍 Location: Toronto Rehabilitation Institute.
- 🧠 You will gain longitudinal exposure across the continuum of physiotherapy for FMD, observing assessment and movement retraining. A variety of presentations will be encountered including functional gait and balance disturbance, tremor, dystonia, and weakness.
- 💻 Led by physiotherapist Rory Higgins with experience of working in specialist FMD services across the UK and Canada.
- 🎓 Upon successful sign off of your competencies, a certificate of completion will be provided.

**Limited spots available**
