UHN Regional Histocompatibility Lab

Thunder Bay – Solid Organ Transplant interpretation:

Initial Recipient Workup	<p>Recipient HLA typing. May be done alone or in combination with crossmatch. If a crossmatch is to be done at the same time, then:</p> <ul style="list-style-type: none"> • Please check Allo – Crossmatch with Kidney Donor • A separate donor sample and requisition must be sent at the same time.
PRA / Antibody Specificity testing	<ul style="list-style-type: none"> • Screens for presence/absence of HLA Ab and gives a PRA result. If HLA Ab are present, single Ag bead testing may be done to determine all the specificities. •
Quarterly PRA testing	For routine quarterly PRA testing for waitlisted KIDNEY patients
HLA Typing	<p>Low resolution HLA A, B, C, DR, DQ, DP Typing. (full typing or selected loci) May be done alone or in combination with crossmatch.</p>
Allo – Crossmatch with Kidney Donor	<ul style="list-style-type: none"> • Crossmatch and autocrossmatch as needed, between recipient and selected donor. • Please indicate if sample submitted with this requisition is a donor or recipient sample. • Note separate requisitions needed for donor and recipient. • If donor sample sent alone, crossmatch will be done with most recent recipient serum in lab. • For pre deceased donor crossmatches, please indicate STAT or Non-STAT
STAT Prospective XM for High Risk Deceased Donor Recipient	<ul style="list-style-type: none"> • For High PRA and/or DSA Pos Patients: T and B cell XM on current and peak PRA serum is done and results are available prior to Tx OR. • PRA is done non-stat and reported out after transplant.
Non-STATXM for Low risk Deceased Donor Recipient	<ul style="list-style-type: none"> • For low immunologic risk recipients: T and B cell XM may be performed the next working day along with PRA and reported out post transplant.
<p>Lab will determine the appropriate technique based on patient testing history as a default. Lab may also change technique from the original order if an alternative is felt to be preferable but will discuss with ordering clinician before doing so. Autocrossmatch included for recipient at least once at initial crossmatch.</p>	
<p>You may request testing on current serum sent with requisition but also on prior serum that we have in the lab. Indicate whether pre-transplant or another date serum is to be tested concurrently.</p>
