

February 12, 2016

Dear Neighbour:

I am delighted to share with you that UHN's Bickle Centre has embarked on a redevelopment project to refresh our facilities. Located at 130 Dunn Avenue, the Bickle Centre is part of North America's leading rehabilitation centre, the Toronto Rehabilitation Institute.

We will also use this as an opportunity to replace the exterior brick façade to ensure the building remains structurally sound and visually appealing.

Neighbours can expect an increase in daily traffic as we add work crews and delivery of supplies to the site. It is our goal to work with contractors to minimize traffic impact to the neighborhood.

Interior work will begin next week and is phased over the next three years. The exterior brick and front canopy replacement is scheduled to begin in late spring and run through the fall of this year. We will update you on aspects of this work as details are finalized.

Throughout this project we commit to keeping you informed and will be hosting an open house for our patients, their families and our neighbours in the weeks ahead. If you have any questions or concerns throughout this project, please contact us through our dedicated email address:

TRI-BickleRenovationQuestions@uhn.ca

Best regards,

Susan Jewell, Senior Vice President & Executive Lead
University Health Network – Toronto Rehab
