A Guide to Finding Dialectical Behaviour Therapy

Talking to your health care provider about your mental health concerns is an important step towards feeling better. They can support you, provide help and guide your progress.

Read this handout if your next step is to learn about Dialectical Behaviour Therapy and find a therapist. If you have questions or need support, please speak to your health care provider.

What is Dialectical Behaviour Therapy (DBT)?

Dialectical Behaviour Therapy or “DBT” is a type of therapy that helps you learn new skills to better respond to your emotions, tolerate distress, be mindful of the present and have effective relationships with others.

‘Dialectic’ means balancing opposites (like acceptance and change) and seeing how they go together.

Generally, people who do DBT will attend 20 or more sessions.

DBT benefits people with Borderline Personality Disorder, addiction, depression, Post Traumatic Stress Disorder (PTSD) and eating disorders.
Where can I find Dialectical Behavioural Therapy?

• This list of therapy services is for information only.
• It is not a complete list of services in the Toronto area.
• We do not endorse any particular therapist or service.

**OHIP covered therapy**

OHIP pays for therapy with a medical doctor. These services usually have waiting lists. You do not need a referral from your doctor.
