Remove Your Mask Safely

We recommend wearing your mask until you arrive safely at home.

1. Clean your hands before touching the mask.

2. Hold the ear loops and then lift the mask away from your face.

Do not touch your face or the front of the mask while wearing it.
3. Put the mask in the garbage if it is disposable. If your mask is reusable, put it in a plastic bag to wash later.

4. Clean your hands again.
