

Where to Find Home Healthcare Equipment and Supplies

Information for patients and families

Read this booklet to find out:

- what are common home health care supplies and equipment
- where you can find home health care supplies
- where you can find medical alarm systems
- who to call if you need more information

What common home health care equipment or supplies may I need?

Home health care equipment and supplies include things like:

- bathtub rails
- chair lifts
- wheelchairs
- hospital bed

You can use this equipment at home to help you move around or be more comfortable. You can buy or rent this equipment.

Personal medical alert or alarms provide emergency help for people at home. These alarms usually have an alarm button that you wear on your neck or wrist. There is also a device attached to the telephone line. You would push the alarm to speak to someone in an emergency.
