

Connecting Dexcom Continuous Glucose Monitor (CGM) with myUHN

Tip sheet last updated: April 2026

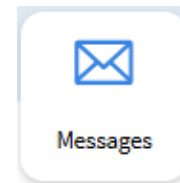

Connecting your Dexcom account with myUHN will share your Dexcom CGM data directly with your healthcare provider. This allows your provider to receive your glucose metrics securely to better manage your care. Your glucose metrics are shared in intervals. They are not shared continuously like in your Dexcom app.

You can connect your Dexcom and myUHN accounts from a desktop or smartphone.

1. Log into www.myuhn.ca

2. Open the **Message Centre**

Note: A preview of the message is visible on the health feed. You can also open the message by clicking **View Message** from the preview on the health feed.

3. Locate the message in the **Conversations** folder. Click on it to view the full message.

Dexcom CGM Integration

Ambulatory Physician, MD

- Your care team has placed an order to have access to the continuous glucose monitor

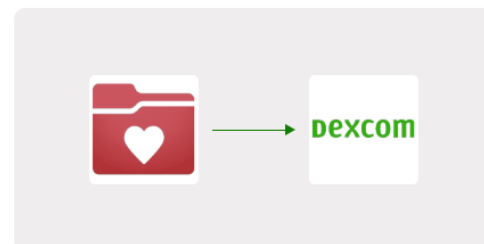

Note: In order to see this message in the message centre, your healthcare provider must request access to your CGM data. If you don't see this message, contact your provider and ask them to request access.

4. Click the linked sentence in the message to connect accounts

If you have a Dexcom account,

[Click here to connect your Dexcom CGM](#)

5. This will launch into **Dexcom**. Click **Continue** and log in with your **Dexcom username and password**.

You're about to leave MyChart to connect with Dexcom.

[Continue](#)

- Once you log into your Dexcom account, you must give consent to share your CGM data. Click **Authorize**.
