

TIME™ Program Research: Articles and Guidelines Published or In Press

1. Inness EL, Koussioris A, Kaur N, Catizzone M, Tse D, Aravind G, O'Neil J, Sheehy L, Fung J, Jones CA, Sveistrup H, Salbach NM. A theory-based approach to adapting a task-oriented community exercise program for virtual delivery for people with balance and mobility limitations. *Physiotherapy Canada*. Available from: <https://doi.org/10.3138/ptc-2024-0030>.
2. Tran J, Ahluwalia R, Kilby-Lechman D, Egbugie BA. Integrated Virtual Exercise for Older Adults in Remote Patient Monitoring Program: A Feasibility Study. *Journal of Primary Care & Community Health*. 2025;16. <https://doi.org/10.1177/21501319251368708>.
3. Salbach NM, Jones CA, Barclay R, Sveistrup H, Sheehy L, Bayley MT, Inness EL, Legasto-Mulvale JM, Barbosa dos Santos R, Fung J, Moineddin R, Teasell RW, Catizzone M, Hovanec N, Cameron JI, Munce S, O'Neil J, Jaglal SB, Aravind G, Su T, Hanson HM. Short-term effects of a virtual, community-based, task-oriented group exercise programme incorporating a healthcare-community partnership compared to a waitlist control on increasing everyday function among adults with mobility limitations: protocol for the TIME™ at Home randomized controlled trial. 2025. *BMJ Open*. Available from: <https://doi.org/10.1136/bmjopen-2025-102694>.
4. Dos Santos RB, Kaur N, Nelson M, Catizzone M, Sheehy L, Munce S, Inness EL, Salbach NM. Feasibility, safety, and potential benefit of a virtual, community-based, task-oriented exercise program (TIME™ at Home) for people with balance and mobility limitations: A pre-post feasibility study. *Disability and Rehabilitation*. 2025. Available from: <http://dx.doi.org/10.1080/09638288.2025.2538757>.
5. Alsbury-Nealy K, Scodras S, Colquhoun H, Jaglal SB, Munce S, Salbach NM. Exploring the role of healthcare partners in referrals to a community-based exercise program with a healthcare-community partnership designed for people with balance and mobility limitations. 2024. *Disability and Rehabilitation*. Available from: <https://doi.org/10.1080/09638288.2024.2390045>.
6. dos Santos RB, Lin J, Badwal A, Singh H, Jaglal SB, Sperling C, Salbach NM. Evaluations of virtual exercise programmes for adults with mobility limitations: a scoping review protocol incorporating an equity lens to inform the development of strategies to optimise participation of under-represented groups. *BMJ Open* 2024;14:e077961. Available from: <https://doi.org/10.1136/bmjopen-2023-077961>.
7. Bercovitch D, Reppas-Rindlisbacher A, Mulvihill S, Ng H, Patel S, Sum B, Aitken L, O'Neill M, Salbach NM, Aravind G. Losing ground following community exercise program closures: A qualitative descriptive study of the impact of COVID-19 related pandemic restrictions on exercise participation, physical activity, and health of older adults with balance and mobility limitations. *Physiotherapy Canada*. 2024. Available from: <https://doi.org/10.3138/ptc-2023-0049>.

8. Aravind G*, Bashir K*, Cameron JI, Bayley MT, Teasell RW, Howe J, Tee A, Jaglal SB, Hunter S, Salbach NM. What matters to program partners when implementing a community-based exercise program for people post-stroke? A theory-based qualitative study and cost analysis. *Frontiers in Rehabilitation Sciences*. 2023;4:1064206. Available from: <https://doi.org/10.3389/fresc.2023.1064206>. *Co-first authors.
9. Aravind G, Graham ID, Cameron JI, Ploughman M, Salbach NM. Conditions and strategies influencing sustainability of a community-based exercise program incorporating a healthcare-community partnership for people with balance and mobility limitations in Canada: A collective case study of the Together in Movement and Exercise (TIME™) program. *Frontiers in Rehabilitation Sciences*. 4:2023. Available from: <https://doi.org/10.3389/fresc.2023.1064266>.
10. Alsbury-Nealy K, Colquhoun H, Jaglal SB, Munce S, Salbach NM. Referrals from healthcare professionals to community-based exercise programs targeting people with balance and mobility limitations: an interviewer-administered survey. *Physiotherapy Canada*. 2023. Available from: <https://doi.org/10.3138/ptc-2022-0069>.
11. Alsbury-Nealy K, Scodras S, Munce S, Colquhoun H, Jaglal SB, Salbach NM. Models for establishing linkages between healthcare and community: a scoping review. *Health and Social Care in the Community*. 2022. Available from: <http://doi.org/10.1111/hsc.14096>.
12. Reszel J, van den Hoek J, Nguyen T, Aravind G, Bayley MT, Bird M-L, Edwards K, Eng JJ, Moore JL, Nelson MLA, Ploughman M, Richardson J, Salbach NM, Tang A, Graham ID. The Stroke Recovery in Motion Implementation Planner: Mixed-methods user evaluation. *JMIR Formative Research*. 2022;6(7):e37189. Available from: <https://doi.org/10.2196/37189>.
13. Reszel J, van den Hoek J, Nguyen T, Aravind G, Bayley MT, Bird M-L, Edwards K, Eng JJ, Moore JL, Nelson MLA, Ploughman M, Richardson J, Salbach NM, Tang A, Graham ID. How community-based teams use the Stroke Recovery in Motion Implementation Planner: Longitudinal qualitative field test study. *JMIR Formative Research*. 2022;6(7):e37243. Available from: <https://doi.org/10.2196/37243>.
14. Aravind G, Bashir K, Cameron JI, Howe J, Jaglal SB, Bayley MT, Teasell RW, Moineddin R, Zee J, Wodchis WP, Tee A, Hunter S, Salbach NM. Community-based exercise programs incorporating healthcare-community partnerships to improve function post-stroke: feasibility of a 2-group randomized controlled trial. *Pilot and Feasibility Studies*. 2022;8:88. Available from: <https://doi.org/10.1186/s40814-022-01037-9>.
15. Elizabeth L. Inness, Gwen Brown, Alda Tee, Liam Kelly, Jason Moller, Gayatri Aravind, Cynthia Danells, and Nancy M. Salbach. *Canadian Stroke Community-based Exercise Recommendations 3rd Edition, 2020*. Canada. The full guideline “Canadian Stroke Community-based Exercise Recommendations Update 2020: A Resource for Community-based Exercise Providers” and companion guide “Choosing a Community Exercise Program After Stroke” are available at: <https://kite-uhn.com/can-stroke-community-based-exercise-recommendations>.

16. Skrastins O, Tsotsos S, Aqeel H, Qiang A, Renton J, Howe J, Tee A, Moller J, Salbach NM. Fitness coordinators' and fitness instructors' perspectives on implementing a task-oriented community exercise program within a healthcare-recreation partnership for people with balance and mobility limitations: a qualitative study. *Disability and Rehabilitation*. 2020;42(19):2687-2695. Available from: <http://dx.doi.org/10.1080/09638288.2019.1570357>.
17. Merali S, Cameron JI, Barclay R, Salbach NM. Experiences of people with stroke and multiple sclerosis and caregivers of a community exercise programme involving a healthcare-recreation partnership. *Disability & Rehabilitation*. 2020;42(9):1220-1226. Available from: <https://doi.org/10.1080/09638288.2018.1519042>.
18. Salbach NM, Howe J, Baldry D, Merali S, Munce SEP. Considerations for expanding community exercise programs incorporating a healthcare-recreation partnership for people with balance and mobility limitations: a mixed methods evaluation. *BMC Research Notes*. 2018;11:214. Available from: <https://doi.org/10.1186/s13104-018-3313-x>.
19. Merali S, Cameron JI, Barclay R, Salbach NM. Characterising community exercise programmes delivered by fitness instructors for people with neurological conditions: a scoping review. *Health & Social Care in the Community*. 2016;24(6):e101-16. Available from: <https://doi.org/10.1111/hsc.12282>.
20. Lau C, Chitussi D, Elliot S, Giannone J, McMahon MK, Sibley KM, Tee A, Matthews J, Salbach NM. Facilitating community-based exercise for people with stroke: cross-sectional e-survey of physical therapy practice and perceived needs. *Physical Therapy*. 2015;96:469-478. Available from: <https://doi.org/10.2522/ptj.20150117>.
21. Salbach NM, Howe J, Brunton K, Salisbury K, Bodiam L. Partnering to increase access to community exercise programs for people with stroke, acquired brain injury and multiple sclerosis. *Journal of Physical Activity and Health*. 2014;11:838-845. Available from: <https://doi.org/10.1123/jpah.2012-0183>.
