

### **What we do:**

- We provide interdisciplinary rehabilitation to individuals who have experienced changes in their physical, perceptual, cognitive or communicative abilities as a result of a neuro-oncology diagnosis affecting the brain.
- We offer short-duration intervention (approximately 6 weeks) that may include assessment and treatment, education and consultation.
- Our team includes Physiatrists, Occupational Therapists, Physiotherapists and Speech Language Pathologists.

### **Who we serve:**

We work with individuals aged 18 or older who have a new neuro-oncology diagnosis, or recurrence, confirmed within the last two years who:

- Have completed radiation treatment, if applicable
- Are mentally, physically and medically stable to participate in regular rehab therapy appointments
- Have not received prior outpatient rehab services for this diagnosis
- Who have rehab goals and the potential to achieve these goals through program participation
- Have reliable transportation to attend in-person appointments, and have a caregiver to accompany them if assistance is required for transfers or wayfinding

### **Where we are located:**

- Toronto Rehab- University Centre  
550 University Ave, Toronto ON, M5G 2A2
- Toronto Rehab- Rumsey Centre (Neuro)  
345 Rumsey Road, Toronto ON, M4G 1R7
- We also offer virtual therapy appointments

### **How to be referred:**

- Referrals must be completed by a Physician or Nurse Practitioner
- Please ask your health care provider to fax the completed referral to **416-597-7021**
