

Fear of Cancer Recurrence for Family Caregivers

Research Study

- Do you worry about your loved one's cancer coming back or progressing or about anyone else in your family getting cancer?
- Do you worry before your loved one's follow-up appointments?
- Do your worries about cancer cause you distress or affect your daily life?

If so, we are conducting a focus group study to better understand and to address these worries

WHO CAN PARTICIPATE?

- A family member (e.g., spouse, parent, child, or sibling) of an adult cancer patient of any type of cancer receiving follow-up care at the Princess Margaret Cancer Centre and who completed cancer treatment

WHAT'S INVOLVED?

All Participants will be asked to

- We are inviting family members 18 years of age or older to complete a demographic questionnaire and take part in a virtual focus group that will last approximately 90 minutes.

OUR PURPOSE

- The goal of this study is to better understand a family caregiver's experiences with fear of cancer recurrence.
